## PROFILE

I am a full-stack engineer with 7 years experience in developing web applications and marketing strategies. Through storytelling and development, I empower entrepreneurs, startups, and business owners to convey their unique style and message.

My experience involves: designing and developing user interfaces, addressing customer/client pain points, creating marketing campaigns, and developing data-driven marketing strategies.

I am a firm believer in lifelong learning and an asset to any creative or product team in search of burgeoning, diverse talent with disruptive ideas.

I am currently looking for opportunities where I can join my web development and/ or advertising knowledge and skills to take a concept and turn it into a finished product.
